

THE ED REIF FIELD SYSTEM

ONE BODY OF WORK. SEVEN DOORS IN.

BUILD > DECIDE > POSITION > COMMUNICATE > PROVE > UPDATE > DEPLOY

BUILD

Operational Readiness

Build capability that survives reality.

DECIDE

Judgment at the Edge

Make defensible decisions under uncertainty.

POSITION

Decision Science

Design exposure, asymmetry, and optionality.

COMMUNICATE

High-Consequence Communication

Make meaning survive the handoff.

PROVE

Operational Readiness Lab

FIELD CARD / OPERATING LOOPS

FROM DOCTRINE TO EVIDENCE

JUDGMENT AT THE EDGE

SIGNAL > CONDITION > LIMIT > DECISION > EVIDENCE

HIGH-CONSEQUENCE COMMUNICATION

SAID > HEARD > UNDERSTOOD > ACTED > VERIFIED

LAB / PROVING LOOP

FAILURE MODE > SIGNAL > THRESHOLD > FRICTION > RED > EVIDENCE > UPDATE

DECISION SCIENCE

PROTECT FLOOR > IMPROVE ODDS > PRESERVE OPTIONALITY > POSITION FOR UPSIDE

XMAL EXPERIENCE

SCROLL > ENCOUNTER > INTERACT > DECIDE > CONSEQUENCE > CONTINUE

CORE INSTRUMENTS

Logic Anchor | Friction Matrix | Telemetry Spec | Evidence Ladder | Experiment Card

Evidence: ILLUSTRATIVE > SIMULATED > PUBLICLY REPORTED > FIELD-OBSERVED > VALIDATED

Engineering in. Capability out. Evidence always.
