

THE ED REIF FIELD SYSTEM

Ed Reif Field System v1.0 - September 2026

ONE BODY OF WORK. SEVEN DOORS IN.

BUILD > DECIDE > POSITION > COMMUNICATE > PROVE > UPDATE > DEPLOY

BUILD

Operational Readiness

Build capability that survives reality.

POSITION

Decision Science

Design exposure, asymmetry, and optionality.

PROVE

Operational Readiness Lab

Stress-test doctrine against friction.

DECIDE

Judgment at the Edge

Make defensible decisions under uncertainty.

COMMUNICATE

High-Consequence Communication

Make meaning survive the handoff.

UPDATE

Field Notes

Capture what reality teaches.

DEPLOY

Operational Readiness-as-a-Service (ORaaS)

Keep readiness operating continuously. The Lab produces evidence. ORaaS keeps the instrument running.

Six Worlds tell the story. Seven Doors organize the work. The Field System connects them.

FIELD CARD / OPERATING LOOPS

Ed Reif Field System v1.0 - September 2026

FROM DOCTRINE TO EVIDENCE

JUDGMENT AT THE EDGE

SIGNAL > CONDITION > LIMIT > DECISION > EVIDENCE

HIGH-CONSEQUENCE COMMUNICATION

SAID > HEARD > UNDERSTOOD > ACTED > VERIFIED

LAB / PROVING LOOP

FAILURE MODE > SIGNAL > THRESHOLD > FRICTION > RED > EVIDENCE > UPDATE

DECISION SCIENCE

PROTECT FLOOR > IMPROVE ODDS > PRESERVE OPTIONALITY > POSITION FOR UPSIDE

XMAL EXPERIENCE

SCROLL > ENCOUNTER > INTERACT > DECIDE > CONSEQUENCE > CONTINUE

CORE INSTRUMENTS

Logic Anchor | Friction Matrix | Telemetry Spec | Evidence Ladder | Experiment Card

Evidence: ILLUSTRATIVE > SIMULATED > PUBLICLY REPORTED > FIELD-OBSERVED > VALIDATED

Engineering in. Capability out. Evidence always.
